- I have the ability to design and craft web pages with concise and meaningful markup, ensuring an intuitive and user-friendly experience.
- Excellent knowledge of CSS and it's properties.

Web Services :

- Familiar with concepts of Client - Server Architecture , API, HTTP
- Have good understanding of web service testing and postman.

Manual Testing:

- Knowledge of Testing life cycle
- Awareness of various testing type such as Functional, Integration, System, Regression etc.
- Familiarity with documenting Test cases, Test result and Defect.
- Good Understanding of different phases of SDLC and it's Models.

Projects:

BRAIN TUMOR DETECTION

MAIN Project

Technologies Used:

- ML
- DEEP LEARNING
- JAVA SCRIPT
- CNN MODEL
- HTML/CSS

Project Description:

- Brain Tumor Detection is a website that verifies the presence of Tumor in brain.
- We have managed it to accomplish certain accuracy in it.

MedAid

Mini Project:

Technologies Used:

- JavaScript
- HTML/CSS

Project Description:

- Medaid is a website that provides online services as like appointment, emergency ambulance service, information about
- Hospital facilities and test which are done in a particular hospital.

Internships and Training Program:

Training Institute : Jspider,Deccan,pune

I am presently dedicating my time to refining my skills in familiar technologies like Java, SQL, Manual Testing, HTML and CSS.

Additionally, I am expanding my knowledge by actively engaging with new technologies such as Spring Boot, Hibernate , J2EE and also gaining hands on experience through diverse project work.

Achievements:

- Took active participation in cricket tournament at university level in jan-2023.
 - Have experience as a technical event coordinator.
 - Represented my school at district level in kho-kho.
-
